

## TCI CYBERSECURITY SERVICES – SUCCESS STORY

Information Assurance (IA)

### Customers & Projects

- Air Mobility Command Applications, Infrastructure, and Systems Support (AISS)
- USTRANSCOM Reference Data Management (TRDM)

TCI's approach to Information Assurance (IA) Strategy and Service Delivery is founded on incorporating security engineering services around the core principles of Confidentiality, Data Integrity, Availability and Authenticity into the Enterprise IT Lifecycle Management. TCI developed effective security assessment plans and a comprehensive set of procedures for assessing the effectiveness of IA security controls employed in information systems supporting the enterprises.

We provided comprehensive overview of the security requirements for the IT systems and implemented required management, technical and operational controls for meeting or exceeding those requirements through a documented Implementation Plan (DIP), System Identification Profile (SIP), and Systems Security Plan (SSP).

For our Federal Government Department of Defense (DoD) customers, we ensured these plans comply with DISA, NIST, and DIACAP guidelines. We also developed migration plans to be aligned with NIST Risk Management Framework (RMF) guidelines.

*TCI has enjoyed a high degree of success performing various Information Assurance (IA) Services. Our Approach has consistently benefitted our customers – It can yield similar results for your enterprise.*

## TCI CYBERSECURITY SERVICES – OVERVIEW

TCI is a CMMI Level 3 company that has served our clients for over 30 years with offices throughout the United States. TCI brings low risk and on-time solutions by combining process maturity and discipline with innovative and fast paced cutting edge practices.

TCI specializes in strategizing, assessing and developing Cybersecurity management capabilities. TCI provides integrated teams of technical and operational subject matter experts who deliver **Full Cybersecurity Lifecycle** support including technical services, and related project management support.

TCI's **Full Cybersecurity Lifecycle** support services spans diverse subject areas including Access Controls, Awareness and Training, Audit and Accountability, Security Assessment, Configuration Management, Contingency Planning, Identification and Authentication, Incident Response, Maintenance, Media Protection, Physical and Environmental Protection, Risk Assessment, Personnel Security, Systems and Communications Protection, and System and Information Integrity.
