TCI DATA SERVICES – SUCCESS STORY

United States Air Force Air Mobility Command (AMC)

Customers & Projects

Air Mobility Command Data Processing Center (DPC)

The mission of the DPC was to ensure that revenue generated through all Air Force mobility activities is collected on a correct and timely basis. The TCI DPC team served as the focal point for all revenue traffic data processing functions worldwide and acts as the catalyst for process improvements in aerial port data records functions and as the liaison between aerial port data records sections and the Airlift Services Industrial Fund Integrated Computer System (ASIFICS) regarding missing manifests.

TCI has enjoyed a high degree of success implementing our Enterprise Data Strategy Support and Methodologies. Our Approach has consistently benefitted our customers – It can yield similar results for your enterprise.

Benefits

TCI has manned and operated the Revenue Traffic Data Processing Center (DPC) and manual/Non-Global Air Transportation System (GATES) at AMC's headquarters, supporting over 22,000 users worldwide since 2004 when HQ Air Mobility Command/A4T established a 24 hour / 7 days a week / 365 days a year DPC.

- Recovered \$628,119,720 for the TWCF since DPC inception in 2004
- Reconciled \$24,149,035 in revenue-generating manifests in FY14
- Reconciled 3,767 revenue generating manifests and 3,744 non-revenue generating manifests in FY14

TCI ENTERPRISE DATA SERVICES – OVERVIEW

Capabilities & Accomplishments

TCI is a CMMI Level 3 company that has served our clients for over 30 years with offices throughout the United States. TCI brings low risk and on-time solutions by combining process maturity and discipline with innovative and fast paced cutting edge practices.

TCI Data Strategy & Services focus on **increasing data quality and use** by implementing clear stewardship responsibilities of both the **business and reference data** at the authoritative origination and destination sources and providing **consistent and accurate view** of Enterprise Data. TCI Data Services includes detailed analyses of the data sources, databases and operational information and exchange flows to **ensure accurate, timely, relevant, and consistent data** throughout the enterprise.

TCI establishes and compiles meaningful metrics to measure the quality of data assimilation, exchange and utilization for effective decision making. We provide broad-based feedback to ensure that current and developing systems implement data definitions, business rules, and supporting interfaces in accordance with enterprise standards. We develop operational data stores that unify all relevant enterprise information into centralized, federated and virtualized repositories utilizing leading traditional and Big Data COTS and Open Source Platforms, Solutions and Technologies.

TCI specializes in providing Full Lifecycle Data Management, Enterprise Grade Business Intelligence/Analytics and Data Solutions founded on our secure Enterprise Data Management Strategy and Technical Practices.
